1. Introduction

1.1. Background

The Government of Guyana has solidified its commitment to ensuring that the benefits derived from the foreign direct investments into Guyana's petroleum sector are captured and retained in-country, through the enactment of the Local Content Act. The [Local Content Act No. 18 of 2021](#) ('the Act') provides for the implementation of local content obligations for companies and persons engaged in petroleum operations or related activities in the petroleum sector and prioritizes Guyanese nationals and Guyanese companies in the procurement of goods and services for the enhancement of the value chain of the sector. The Act also serves to enable local capacity development and provides for the investigation, supervision, coordination monitoring, and evaluation of, and participation in, local content in Guyana.

The Local Content Secretariat ('the Secretariat') is mandated to ensure that the provisions of the Act are implemented and functions as the focal point for the monitoring, evaluation, coordination, and reporting of local content in the petroleum operations of Guyana.

In so far as the Act mandates every Contractor, Sub-Contractor, or Licensee to implement local content as an essential component of their petroleum operations, the Secretariat, through the issuance of industry guidelines, aims to provide detailed and specific guidance to Contractors, Sub-Contractors, or Licensees with regards to their reporting obligations.

The Act obligates Contractors, Sub-Contractors, or Licensees to submit a five (5) year Local Content Master Plan (the 'Master Plan') to the Minister for approval. As such, this guideline serves to standardize reporting requirements, procedures, and the form with regard to the submission of the Master Plan for approval.

For Contractors, Sub-Contractors, or Licensees existing prior to the coming into operation of the Act, the five (5) year Master Plan shall cover the period from the 1st day of January 2022 to the 31st day of December 2026¹. The Secretariat recognizes that this five (5) year period may extend beyond the contractual or licensing obligations of some Contractors, Sub-Contractors, or Licensees. Contractors, Sub-Contractors, or Licensees are therefore required to submit a Master Plan covering the remaining period over which their contractual or licensing obligations permits. This period should be explicitly stated in the Master Plan submitted to the Minister for approval. For instances where the conduct of petroleum activities is hinged upon Governmental Approval, such as the renewal of a prospecting or production license or transferring of interest in the license, the requested information, where stated within the Master Plan, should be provided with a caveat clearly stating same to the Minister.

The Master Plan is intended to provide the Minister and the Secretariat with an understanding of the Contractor's, Sub-Contractor's, or Licensee's projected activities as it relates to the areas of employment, procurement, and capacity (supplier) development, directly related to Guyana's petroleum operation. It is recognized that due to the volatility of the industry, planned figures are subject to change and as such

¹ Subsection 4(1)(b), (c) and (d) of this guideline provides further direction on the requirement to submit a Master Plan to the Minister for approval.
