Job Purpose

The primary role of this job is to gain exposure to all aspects of the Completions Product Line operations including equipment assembly, testing, inspection, installation, and closure (under supervision). You will work with the technical support function for the Field Service Supervisor and crew which will include performing calculations, checking technical documentation to ensure equipment is fit-for-purpose. You will be responsible for data collection and ensuring that all job parameters are measured, recorded, and reported in the job report. You will also be expected to follow a specified learning plan that will include various computer-based learning modules. During this phase, you may take on miscellaneous tasks as assigned to you by your Supervisor.

Roles & Responsibilities

- Attend classroom/online instructional sessions aimed at product line specific training
- Complete assigned computer-based training as per the predetermined Learning Plan.
- Perform job preparation tasks under supervision such as measuring and documenting sales and rental items, assembly of tools per work instructions, preparation for testing, disassembly, and repair of items per procedure.
- Prepare equipment for dispatch under supervision; package and load-out
- Witness and execute under supervision the following: pre-job briefing, on-site equipment inspection and installation per job program.
- Perform on-the-job calculations
- Setup, recording and collection of necessary job parameters for job reporting
- Assist in the formal job closure including post job tool inspections, back-loading of equipment, job ticket signature, job submission to Weatherford Performance Tracking System (WPTS)
- Prepare and keep accurate paperwork on delivery tickets, job reports, time sheets and other similar administrative forms.
- Keep accurate paperwork of equipment used and services provided in the field.
- Recommend measures to improve methods, performance, and quality to increase efficiency.
- Assist in the shop and make deliveries when available
- Attend all required safety training.
- Must understand and comply with all safety rules and company policies of Weatherford.
- Work assignments carried out to the highest quality level.
- Must be able to travel for extended periods of time.
- Perform various other duties and activities as assigned by supervisor within the physical constraints of the job.

Experience & Education

REQUIRED

- An Engineering Diploma or equivalent
- Minimum of 1 year experience in Field Engineering or equivalent
- Proficient verbal and written communication skills
- Working knowledge of Microsoft Office (Excel, Word, Power Point, Visio)
- Ability to problem solve using thorough analytical skills.

PREFERRED WOULD BE AN ASSET

- Knowledge of the Completions Product Line products and services including having the ability to correctly identify all tools and components
